PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience designing, developing, and deploying scalable web platforms across JavaScript, TypeScript, React.js, and Node.js, with hands-on domain experience in automotive dealership ERP systems, HR management platforms, and e-commerce. Practical background in micro-frontend architecture, distributed microservices, **role-based access control (RBAC)**, and low-latency API optimization (**~100 ms under heavy transaction load**). Proven track record building and refining multi-tier workflows across vehicle inventory, sales booking pipelines, shift allocation, and automated approval matrices. Experienced in authoring type-safe backend services with **Prisma ORM** and **PostgreSQL/MySQL**, creating real-time **WebSocket** communication channels, and leading technical walkthroughs for enterprise end-users and stakeholders.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, Ant Design, Tailwind CSS, Bootstrap 5, HTML5, CSS3

Backend: Node.js, Bun.js, Express.js, REST APIs, Socket.IO, Prisma ORM, Sequelize ORM, JWT, Bcrypt.js, Middleware Design

Databases: MongoDB, Qdrant (Vector DB), PostgreSQL, MySQL, Mongoose ODM, MongoDB Atlas, Database Schema Design

DevOps: Git, GitHub, Gitea, CI/CD, Render, Vercel, Husky, lint-staged

Tools: Postman, Figma, VS Code, WebStorm, Google AI Studio, Hugging Face, ESLint, Prettier, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer • Qugates Technologies

Bengaluru, KA | Feb 2026 – Sept 2026

- **Enforced** a centralized **Role-Based Access Control (RBAC)** engine for the Qugenie automotive ERP and HRMS platform across **700+ daily active employees**, governing granular permissions and **15+ multi-tier approval hierarchies** across all **4 operational divisions**.
- **Owned** the end-to-end full-stack architecture of the primary **Sales ecosystem comprising 19 operational submodules** (Dashboard, Enquiry, Test Drive, Quotation, Booking, Cancellation, Inventory, PDI, RTO, Reconciliation, Vehicle/Customer Hubs, Delivery) alongside **25 analytical MIS Sales Reports**.
- **Engineered 9 enterprise submodules across 3 core divisions: 4 in HRMS** (Task Management, Recruitment, Training Policy, Meeting Scheduling), **4 in Admin** (Fuel Indent, Shift Allocation, Work Scheduling, Configuration), and **1 in Finance**.
- **Delivered** modular micro-frontend interfaces with React.js and Ant Design, implementing high-volume operational screens with resilient state management across multi-branch dealership workflows.
- **Optimized** Node.js microservices and MySQL queries to maintain **~100ms average API response times** during peak concurrent dealership transactions.
- **Standardized** collaborative engineering workflows on **Git and Gitea** with branch isolation strategies and structured pull-request reviews, while conducting technical product walkthroughs for enterprise automotive client stakeholders.

MERN Stack Intern • QSpiders

Bengaluru, KA | Jan 2025 – Dec 2025

- **Constructed** modular client-side interfaces in **React.js** using custom hooks and **Redux Toolkit** slices to manage global state across complex multi-step user workflows.
- **Executed** multi-stage MongoDB aggregation pipelines (\$lookup, \$group, \$project) across multi-collection datasets, **reducing reporting dashboard query times by ~35%**.
- **Created 15+ RESTful backend endpoints** with Node.js and Express, integrating centralized middleware for payload validation, error propagation, and structured request logging.
- **Configured** stateless authentication flows using **JSON Web Tokens (JWT)** and **Bcrypt** password hashing, securing private API endpoints and establishing route-level access controls.
- **Collaborated** within two-week Agile sprint cycles, participating in daily stand-ups, backlog grooming, and Git pull request reviews to ensure code reliability across releases.

TECHNICAL PROJECTS

ShowOff – AI Blogging Platform | [showoff4u](#) | [GitHub](#)

React 19, TypeScript, Express 5, Sequelize ORM, MySQL, Cloudinary, Pollinations AI, TipTap, Zod, Vite | 2026

- **Architected** a monorepo full-stack publishing platform with a layered **Express backend** (Routes → Middleware → Controllers → Models → MySQL via Sequelize) and a **React 19 + Vite** SPA frontend, featuring a headless **TipTap (ProseMirror)** rich-text editor with custom code blocks, inline image embedding, and Markdown rendering via the marked library.
- **Built** a **GitHub-integrated Project Showcase** module allowing developers to link repositories and auto-fetch/decode GitHub READMEs into living devlog timelines; shipped a polymorphic Bookmark system supporting both blogs and projects with an instant-filter Library page for saved content.
- **Designed** a **five-tier AI cover art generation pipeline** integrating Gemini 2.5 Flash, Mistral, Unsplash and Pexels APIs, and Cloudflare Workers AI, with cron-scheduled lifecycle management to clean up orphaned Cloudinary assets.
- **Secured** session authentication using **JOSE HS256 JWTs** with 7-day expiry in httpOnly cookies, native **Argon2** password hashing, and SHA-256 hashed password resets via **Resend and React Email**, paired with a **Multer** memory-storage upload pipeline streaming media directly to **Cloudinary**; crafted a keyword-frequency classification engine for automatic tagging, an analytics dashboard with reading time estimation, and strict form validation using **React Hook Form and Zod**.
- **Validated** production readiness through load testing (**5,000-plus requests with a 0 percent error rate**), security audits achieving an **A-plus** rating on **Security Headers** and **Mozilla Observatory**, and **Lighthouse performance** audits scoring **98 for Performance** and **100 for Best Practices and SEO**, deployed on Render and Vercel with cron-based uptime monitoring.

DesireMart – E-Commerce Platform | [GitHub](#)

Next.js 16, React 19, MongoDB, Redux Toolkit, Clerk, Stripe, Tailwind CSS, shadcnUI, Framer Motion | 2025

- **Developed** a production-grade e-commerce platform with **Next.js 16 App Router** using route groups — (public) for guest access and (users) for authenticated flows — supporting product browsing, cart management, wishlist, and multi-step checkout (Address → Payment → Confirmation).
- **Integrated Stripe Payment Element** for full card-based checkout and Cash on Delivery (COD) with post-payment verification; established **Clerk webhook-based user sync** to MongoDB on user create/delete events.
- **Architected** client-side state with Redux Toolkit (cart, products, address slices) and Mongoose schemas across **7 data models** (User, Product, Cart, Order, Address, Review, Wishlist) with compound unique indexes for data integrity.
- **Built** complete address management (CRUD with default selection), review system (one review per user per product), Embla Carousel with autoplay, 3D Comet Card with tilt/glare mouse tracking, and Framer Motion page transitions.
- **Enforced** code quality via **Husky pre-commit** hooks running **ESLint** and **Prettier** on all staged files; set up Next.js image optimization across 6 external domains including Clerk, Stripe, and product CDNs.

Real-Time Chat Application | [ChatApp](#) | [GitHub](#)

React.js, Socket.IO, Express.js, MongoDB, JWT | 2025

- **Designed** a real-time one-to-one and group messaging platform with live typing indicators, online presence detection, and persistent message history, achieving a **15% latency reduction** by optimizing WebSocket events and RESTful API endpoints.
- **Implemented JWT authentication** with secure session management and deployed on cloud infrastructure with CI/CD pipelines organized for automated testing and **zero-downtime continuous deployments**.

EDUCATION

Bachelor of Technology – Computer Science and Engineering – CGPA: 7.03

Dr. APJ Abdul Kalam Technical University (AKTU), Lucknow | 2021-2025

Intermediate (Class XII), CBSE – 75.5%

Radhika Senior Secondary School, Gorakhpur | 2021

High School (Class X), CBSE – 76.6%

Narayana E-Techno School, Bengaluru | 2019

CERTIFICATIONS

MERN Full Stack Development – QSpiders, Bengaluru (2025)
